EVERY PAYOR AND NETWORK IS DIFFERENT....
I-Network can be configured to tailor fit the process

Build
Cleaner
Networks

Get clean provider data early on and throughout the process. I-Network's suite of tools ensures that clean provider and network data can be combined and stacked.

Data
Cleansing

Build
Networks Faster

Build networks in record time by allowing providers to sign up online, import provider and network rosters, as well as expedite credentialing and network assignments.

Add data from multiple sources such as leased files, delegated files, provider rosters, CAQH rosters, and NPPES.

Improve provider retention rates by improving providers' onboarding, credentialing, and re-credentialing experiences.

Network

Accurate
# Directories
and Contracts

I-Network gears up organizations to comply
with CMS directory requirements with greater
ease. It also automates directory feeds that
improve member satisfaction levels by improving
the quality and timeliness of directories.

I-Network also improves claims processing
by increasing the quality of data that
claims systems rely on.

Documents

Make document search and storage intuitive and better integrated with your provider data. Now you can set up system audit rules that alert you of incomplete provider documents. Recruiters can jumpstart the onboarding process by uploading necessary documents. Providers can complete applications, upload source documents, e-sign remotely, upload and access provider documents and licenses from anywhere at any time.

e-Sign is
the new trend

Providers are afforded the ease and efficiency of electronically signing credentialing and contracting documents. I-Network's e-signature capabilities are recognized as best-in-class by the leading e-signature providers in the industry. I-Network allows credentialing staff to seamlessly send files to providers for their review and signature, which is accompanied by a digital signature certificate.

Transform Provider Network Management

Santéch was named a Major Player in the IDC MarketScape: U.S. Provider Data Management 2022 Vendor Assessment, doc #US48815718, Feb 2022)

IDC MarketScape vendor analysis model is designed to provide an overview of the competitive fitness of ICT (information and communications technology) suppliers in a given market. The research methodology utilizes a rigorous scoring methodology based on both qualitative and quantitative criteria that results in a single graphical illustration of each vendor's position within a given market. IDC MarketScape provides a clear framework in which the product and service offerings, capabilities and strategies, and current and future market success factors of IT and telecommunications vendors can be meaningfully compared. The framework also provides technology buyers with a 360-degree assessment of the strengths and weaknesses of current and prospective vendors.

Santéch was named a Major Player in the IDC MarketScape: U.S. Provider Data Management 2018 Vendor Assessment, doc #US44514018, December 2018
